### Understanding Oral Cancer

Oral cancer can affect any part of the mouth, including the lips, tongue, gums, inner cheeks, and roof or floor of the mouth. Early detection is crucial, as it significantly improves the chances of successful treatment.

### Signs to Watch For:

- Persistent mouth sores or ulcers that don't heal
- Lumps or growths in the mouth
- Difficulty swallowing or speaking
- Unexplained bleeding or numbness in the mouth
- Red or white patches inside the mouth

If you notice any of these symptoms, it's important to consult an oral cancer specialist immediately.
